

## ***Certificate of Quality Commitment***

This certifies that the products manufactured by Media Technologies, Ltd. are subject to the industry's highest standards of quality at every level of production. From design through PCB layout, component procurement, electronic subsystem assembly, mechanical fabrication to finishing and testing the final product. Typical manufacture procedures are described below.

## ***Satisfaction Guaranteed***

Dedicated to customer service and quality manufacturing, Media Technologies Ltd. guarantees its products will be free of defects in materials and workmanship and will replace any product that fails to perform as promised. Contact our Customer Service Department for details.

### ***Design, Manufacturing and Test Procedures Used in Production***

#### **Product Design Development and Final Assembly and Test**

Media Technologies designs all products entirely in-house using industry standard hardware and software development tools. We partner for sub-assembly manufacture (see below), but we carry out all final assembly and test entirely in house. Every product is inspected for quality and certificated on leaving our facility for shipping to the customer. Key management and engineering personnel are certified by the Institute of Engineering and Technology (IET) and registered with the Engineering Council of the UK and Fédération Européenne d'Associations Nationales d'Ingénieurs (FEANI).

#### **Electronic Sub-Assembly Manufacture**

All component procurement and electronic sub-assembly manufacture for our products are carried out by our Electronic Manufacturing Services (EMS) partner Kelvinside Electronics Ltd. of Glasgow-Scotland. Kelvinside Electronics are ISO9001 certified.

#### **Mechanical Fabrication**

All Enclosure and Mechanical Fabrication for our products is carried out by our partner Zot Engineering Ltd. of Musselburgh-Scotland in a purpose-built facility of 14,000 square feet, with over sixty people covering a range of both highly skilled craftsmen and specialist fabrication machinery.
